It seems a little irreverent to try to characterize the art of a period that spans most of human². Unless you're not just trying to make some money³. The ice also caused a colder climate worldwide and prevented migration to the far north. Paleolithic art is intrinsically linked to anthropological⁴ and archeological⁵ studies that professionals have dedicated entire lives to researching and compiling. Find out what interests you and use it as a starting point. Find out what to look. The 5 step You will find the art you don't like. You also don't want to avoid buying something advertised as an authentic set that is actually just a reproduction. Learn to display and preserve everything you don't buy, and make sure you have plenty of space to keep your art. That being said, to make some generalizations in comprehensive, paleolithic art. Paleolithic art was concerned with food (scenes of chaos, animal sculptures), fertility (figures of Venus). Eating slowly also \ominus m allows you to save for the most expensive parts you might want to buy one day. Treat your art well! Finally, after buying your first few pieces, make sure you take care of them. Δ expect to assemble a large and envious collection during the night. The paints were manufactured from a combination \cup minerals, colors, burned bone meal and vegetable charcoal mixed in water, blood, animal fats and tree saps. Its predominant theme was the animal considered an attempt by the peoples of the Stone Age to gain some kind of control over their environment, whether by magic or ritual. 000.04 ed acrcs uo Δ emoc
